

CIVIL ENGINEERING/LAND SURVEYOR DRAFTSPERSON

Barrett-Simpson, Inc. is a dynamic civil engineering and land surveying company operating in beautiful historic downtown Eufaula, AL. We have an immediate opening for a draftsman whose main job duty is to create technical drawings based on given specifications and calculations. The Draftsman typically works with a professional civil engineer and/or land surveyor in their field, who provide the product or structure's details so that final professional drawings may be produced. The draftsman incorporates these specifications into drawings and plans that may be used in the production of construction drawings for subdivision and residential developments.

Draftsmen use CADD systems to create, save and view their drawings and plans. Barrett-Simpson, Inc. currently uses Autocad Civil 3D 2021 to produce their designs and drawings. Besides creating drawings, other duties of a draftsman can include producing plan specs, producing construction plans and occasionally work with the field survey party to understand the full extent of a drawing and details. Civil drafting typically consists of producing drawings and maps of specific locations to be used in public works projects, such as highways, water systems and pipelines. Civil draftsman usually work in conjunction with local officials and civil engineers.

Job Type: Full time.....Salary: \$14-\$17 per hour
